

What is claimed is:

1. A tire wheel set having a front wheel to be attached to a front axle of a vehicle and a rear wheel to be attached to a rear axle thereof,

wherein the rear wheel is greater in rigidity than the front wheel.

2. A tire wheel set according to claim 1, wherein the front wheel and rear wheel each have a disk and a rim, and the disk and/or rim of the rear wheel is greater in thickness than that of the front wheel.

3. A tire wheel set according to claim 1, wherein the rear wheel is formed of a material greater in rigidity than that of the front wheel.

4. A tire wheel set according to claim 1, wherein the front wheel and rear wheel each have a design portion, and the rear wheel is greater in rigidity than the front wheel by changing the design of the design portions.

5. A tire wheel set according to claim 1, wherein the rear wheel has a rim width smaller than the front wheel.

6. A tire wheel set according to claim 5, wherein the front wheel and rear wheel have the substantially same size and thickness of respective corresponding parts thereof.

7. A tire wheel set according to claim 6, wherein a difference between nominal rim widths of the front wheel and rear wheel is $1/2$ to 2.

8. A tire wheel set according to any one of claims 1 to 7, wherein the rear wheel is 10% to 60% greater in rigidity than the front wheel.

9. A tire wheel set according to any one of claims 1 to 8, wherein at least one of the front wheel and rear wheel has an identification mark.

10. A vehicle having a tire wheel set according to any one of claims 1 to 9.
